

The mission of KWI INTERNATIONAL ENVIRONMENTAL TREATMENT GMBH is to fulfill the expectations of its business associates (customers, staff, suppliers, company owners, society and environment) to the best of its ability. This is considered an essential prerequisite for the success of the company.

Bearing in mind this company strategy, the following management objectives have been defined:

- First and foremost, we strive for optimum fulfillment of the requirements and expectations of our **customers**.
- We consider our **suppliers** to be carefully selected competent partners, with whom we want to achieve a long-term fair cooperation. In case of identical performance level, our suppliers will enjoy priority over third parties.
- Our apprentices are trained to become highly qualified skilled workers. High priority is given to education, training and empowerment (e.g. self-inspection by the worker, supervision of plant assembly on site) of our **employees** to encourage their development and motivation. Safety and health protection on the place of work have most supreme priority.
- KWI sees its social responsibility in a **long-term employment security** for the region of Lower Carinthia. High productivity in plant production and our **contribution to the profitability of the KWI group** shall secure our production site on a long-term basis.
- Our activities in **environmental protection** are based on our own initiative and responsibility. The continuous improvement in the environmental results and the legal compliance is an important request. Above all the avoidance and reduction of waste as well as the minimization of dangerous materials have priority. Not avoidable waste are disposed professional.
- To cope with the steadily rising requirements, the **continual improvement** of our applied management system is of decisive importance. Non-conformities detected by self-inspection, audits, customer claims, risk evaluation etc. are transformed into corrective actions.
- The **research and development** of KWI – products are also a big sections, which are expressed by patent application.

In order to satisfy the resultant requirements, the management of KWI INTERNATIONAL ENVIRONMENTAL TREATMENT GMBH has introduced a managementsystem in accordance with ISO 9001 and ISO 14001. The company's organizational and operational structures are focused on these objectives.
