

Case history brief:

Location:	Rayong, Thailand
Application:	Wastewater Treatment integrated with Potable Water
Capacity:	400 m ³ /day
Clarification:	n.a.
Chemicals:	n.a.
Installation:	Turnkey, 2000

Case history features:

The problem.

Customer was searching for BOOT solution to integrate a centralized waste water treatment with the potable water treatment with the following capacity:

- Total 20,000 m³/day
- Wastewater Treatment 9,600 m³/day
- Potable Water Treatment 10,500 m³/day

The solution.

For this plant KWI proposed a KWI Sandfloat BP for the treatment of potable water and an SBR system for Biological Wastewater.
